

Our spill containment berms are lightweight and easily transported and offer protection through puncture resistant ground cover. ETS offers standard sizes or custom built sizes for more generalized needs. Our long lasting durable design is compatible with industrial chemicals. Spill containment systems improve environmental safety by capturing liquids and preventing accidental spills. For extra safety additions ask about our traction mats and berm mats!

### Features

- ◇ Offered in the following sizes:  
12x12x1, 12x25x1, 12x50x1
- ◇ Custom made berms available for purchase
- ◇ Track guard and spill containment mats available for protection against ground punctures and unstable ground site conditions
- ◇ Lightweight and easily transported
- ◇ Easy assembly

### Applications

- ◇ Compatible with multiple sizes of containment solutions
- ◇ Boxes
- ◇ Pumps
- ◇ Pipelines
- ◇ Tanks
- ◇ Valves
